

Semester 1.

№	Course unit title	ECTS	Control	Learning outcomes of the course unit
1	Global Economy	4	Exam	<p>The student knows:</p> <ol style="list-style-type: none"> 1. the nature, conditions and factors of the global economy; patterns of global privatisation business; the genesis of global economic integration; 2. the nature, forms, models and competitive advantages of regional economic integration in a global context of development; 3. dynamics of the processes of institutionalization of global economic development; 4. the forms and mechanisms of socialization of the global economy; mechanisms and tools of anti-crisis regulation of economies in the global system; 5. the effect of the competitive global market mechanisms; directions of Ukraine's integration into the global economic space; <p>The student is able to:</p> <ol style="list-style-type: none"> 1. analyze the trends in the globalization of economic development; 2. detect and assess problems of international business development in conditions of globalization; 3. develop strategic measures to ensure the international competitiveness of products, services, businesses, industries, sectoral systems; 4. organize the processes of management of international economic activity of regions, sectors, sectoral systems; 5. determine the regulatory priorities of the formation of modern international economic policy.
2	Social Responsibility	4	Exam	<p>The student knows:</p> <ol style="list-style-type: none"> 1. foundations of the origin of the concept of social responsibility of business; 2. the classification of varieties of social responsibility, depending on the varieties of social norms, which operate in the community, the basic key provisions of the concept of social responsibility of its common features and comparison with the legal liability, the main essence of the doctrine of the social responsibility of corporations. <p>The student is able to:</p> <ol style="list-style-type: none"> 1. operate the basic economic categories; 2. analyze models of social responsibility, reasons of the procedure and practices of the

				companies social responsibility of the main aspects of the activity.
3	Labour Protection in the Field	1	Credit	<p>The student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - the essence of the notion of labour protection management system (LPSM); - the structural scheme of LPSM; - demands to the system of labour protection management system for a concrete enterprise of the field or its division; - the scheme of analysis of labour protection activity at an enterprise; - the calculation of the cost of compensation for work in adverse working conditions, the cost of insurance premiums, costs due to emergencies. <p>2. Describe:</p> <ul style="list-style-type: none"> - the dynamics of effectiveness of LPSM functioning, possible indicators of efficiency; - indicators of efficiency of LPSM functioning; - participation of the labour collective in the labour protection management system; - reports and recordings of the conditions of labour safety. <p>3. Define:</p> <ul style="list-style-type: none"> - owner's responsibilities for the establishment and functioning of LPSM; - role, rights and responsibilities of each employee in LPSM of an enterprise, field; - costs for labour safety measures.
4	Financial Management	4	Exam	<p>The student knows:</p> <ol style="list-style-type: none"> 1. basics of financial decisions, their regulatory framework, methods of cash assets, commodity-material assets, receivables; 2. methods of dividend payments; 3. features of the management structure of the capital and financial risk management; 4. methods of financial investments, as well as mechanisms for developing and carrying out anti-crisis measures. <p>The student is able to:</p> <ol style="list-style-type: none"> 1. operate the basic economic categories, analyze financial reporting entities; 2. justify of the choice of sources of financing enterprises, rely on optimal volumes of purchases, cash, accounts receivable; 3. carry out operational analysis of profit reasons of most effective option to plan dividend policy, capital structure of an enterprise; 4. determine the directions of financial investments, evaluate financial risks and develop measures of crisis management.

5	Financial Services Market	4	Exam	<p>The student is able to:</p> <ol style="list-style-type: none"> 1. outline the differences between the major participants in the financial services sector, including banking, insurance, superannuation and other non-banking financial intermediaries; 2. describe and evaluate the impacts of financial markets and instruments in a global system with an understanding of multiple perspectives; apply international standards and practices within a global context; 3. explain the role of regulatory authorities in the financial services sector in Ukraine, understand how different financial markets function, including debt markets, equity markets, foreign exchange markets; 4. explain and describe the salient features of various financial products, services and instruments, including risk management instruments traded in these markets; 5. justify how segmentation is used to understand and manage customer behaviour; 6. describe how to develop new products (goods and services) that add value to consumers and firms; evaluate financial products; 7. prove how efficiently manage multiple product or brand portfolios across multiple customer segments, and how to develop an effective marketing strategy in modern financial service organisations.
6	Risk-Management of Business Entities	3	Credit	<p>The student is able to:</p> <ol style="list-style-type: none"> 1. Explain: <ul style="list-style-type: none"> - concepts and terminology of the risk-management; - the essence of identification, assessment, minimization and neutralization of risks; - the relationship between the identified risks and other parameters of financial and economic activity of business entities. 2. Describe: <ul style="list-style-type: none"> - existing financial risk governance concepts and spheres of their practical use; - forms, principles, methods, mechanisms and tools of risk-management; - possible financial management solutions in the field of risk-management. 3. Define: <ul style="list-style-type: none"> - expediency of risk taking and evaluate the maximum amount of risk retention; - parameters and forms of risk management under conditions of uncertainty; - effectiveness of the risk management system of a business entity.
7	Management of Bank Risks	3	Credit	<p>The student is able to:</p> <ol style="list-style-type: none"> 1. Explain:

				<ul style="list-style-type: none"> - essence of bank risks under conditions of uncertainty; - causes, sources and nature of bank risks occurrence. <p>2. Describe:</p> <ul style="list-style-type: none"> - methods of bank risks minimization; - classification of bank risks and threats; - components of the system of bank risks management; - organizational and functional features of bank risks management. <p>3. Define:</p> <ul style="list-style-type: none"> - mechanisms of managing credit, interest-rate, currency risks; - features of functional bank risks and formulate elements of the system of functional bank risks management. - effectiveness of the system of management of bank risks.
8	Budget Management	3	Credit	<p>The student knows:</p> <ol style="list-style-type: none"> 1. objectives, functions and structure of the operational budget; 2.. theoretical and practical aspects of implementation of the revenue and expenditure part of the budget; 3. the mechanism for implementation of the budget in financial institutions and fiscal accountability; 4. methods reference work of financial bodies to implement the budget; 5. the mechanism of treasury system performance. <p>The student is able to:</p> <ol style="list-style-type: none"> 1. analyze and synthesize material on problems of management of budgetary relations and budget process; 2. formulate relevant conclusions and proposals, perform calculations of budgetary measures.
9	Financial Management of State Enterprises	3	Credit	<p>The student is able to:</p> <ol style="list-style-type: none"> 1. Explain: <ul style="list-style-type: none"> - concepts-terminological apparatus of the state enterprises management; - difference in the principles and methods of management of state and private ownership enterprises; - fundamental differences in organizational and legal forms of state enterprises in Ukraine. 2. Describe: <ul style="list-style-type: none"> - structure of the financial resources of state enterprises, methods and sources of their formation;

				<ul style="list-style-type: none"> - fundamentals of organization of financial work and financial activities of state enterprises; - basic methods of assessing the financial condition, financial planning and restructuring of state enterprises. <p>3. Define:</p> <ul style="list-style-type: none"> - current problems in the area of state enterprises finance and propose ways of their solving; - trends in economic structures relations with state authorities and management, financial and tax authorities, institutional investors, commercial banks, etc.; - possible directions of improvement of financial and credit relations of enterprises with fiscal, tax and banking systems.
10	Regions' Finance	2,5	Credit	<p>The student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - the role of regions finance in national financial system, - the legal basis for the functioning of regions finance; - the need to reform the system of regional finance. <p>2. Describe:</p> <ul style="list-style-type: none"> - formation sources and directions of use of financial resources of the region; - elements of the financial potential of the region; - the system, models and the mechanism of regions financial management; - order of making management decisions, aimed at improving the financial situation of enterprises and organizations of the region; - methods of forecasting the development of the region finance; - ways of financial ensuring social-economic development of the region; - the method of analysis of financial activity in the regions; - methodology for assessing the financial security of regions. <p>3. Define:</p> <ul style="list-style-type: none"> - the nature, structure and functions of the region finance; - the concept of financial resources, financial capacity, financial security of the region; - main directions of activity of regional authorities in achieving effective results in the financial development of the region; - main directions of state regional policy and financial policy of regions and instruments of their implementation.
11	Investment Lending	2,5	Credit	The student is able to:

				<p>1. Explain:</p> <ul style="list-style-type: none"> - main provisions of the legislative and normative base of credit and investment activity; - concepts and terminology on the organization and regulation of banking investment activity and bank crediting; - content of passive banking operations, sources and mechanism of formation of the financial resources of commercial banks; - the content of active operations of commercial banks, investment fundamentals of bank crediting. <p>2. Describe:</p> <ul style="list-style-type: none"> - credit market of banking services based on established principles of dealing with issues of organizing work on investment lending; - execution of operations on investment lending; - maintenance of credit, currency and other accounts, conclusion of agreements with counterparties. <p>3. Define:</p> <ul style="list-style-type: none"> - assessment of the effectiveness of operations conducted by the bank, and to find optimal solutions; - risk assessment while crediting and the existing methods, design modern schemes of operations in providing investment credits.
12	Business Planning	3	Credit	<p>The student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - the essence of the business plan; - the structure of the business plan, its components; - implementation phases of the business plan; <p>2. Describe:</p> <ul style="list-style-type: none"> - peculiarities of developing marketing plan of business planning; - peculiarities of developing a plan of business planning production; - peculiarities of developing a plan of business planning staff; - peculiarities of developing a financial plan of production of business planning; <p>3. Define:</p> <ul style="list-style-type: none"> - feasibility of implementing a business plan; - strong and weak positions of the business plan; - general financial indices of the future business plan implementation; - key aspects of the business plan implementation.

13	Financial Monitoring of Projects	3	Credit	<p>The student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - the essence of financial monitoring of projects; - the mechanism of the implementation of projects financial monitoring; - stages of the financial monitoring of projects; <p>2. Describe:</p> <ul style="list-style-type: none"> - current state of the financial monitoring of projects in Ukraine; - features of the financial monitoring of projects in different sectors of the national economy; - methodology of conducting financial monitoring of projects; <p>3. Define:</p> <ul style="list-style-type: none"> - the overall financial condition of different types of business entities; - effectiveness of implementation of various projects; - financial problems in project implementation.
14	Innovation Policy and Financial Support	2	Credit	<p>The student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - concepts and terminology on innovation and innovation activity; - the essence of innovation policy and stages of its implementation; - principles and features of the formation of state innovation policy. <p>2. Describe:</p> <ul style="list-style-type: none"> - the specific system of innovation activity funding; - state priorities in the sphere of science and technology; - mechanism of innovation activity and innovation process. <p>3. Define:</p> <ul style="list-style-type: none"> - sources of funding of innovative projects and program; - the essence of the scientific-technological and innovation potential of the country; - needs of financial support for innovative projects.
15	Exchange Activities	2	Credit	<p>The student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - tasks and functions of the exchange, the exchange structure; - content of economic relations of exchanges with customers; - the order of taxation of exchange contracts. <p>2. Describe:</p> <ul style="list-style-type: none"> - development of the world and Ukrainian exchange trading;

				<ul style="list-style-type: none"> - rules for the stock transactions; - methods and tools of technical analysis. <p>3. Define:</p> <ul style="list-style-type: none"> - qualitative assessment of the state of securities market and quantitative assessment of its dynamics; - economic indexes of the exchange trade of shares; - exchange rates of foreign currencies.

Semester 2

№	Course unit title	ECTS	Control	Learning outcomes of the course unit
1	Innovative Development of an Enterprise	4	Exam	<p>The student knows:</p> <ol style="list-style-type: none"> 1. modern organizational forms of innovation, its main stages and principles of effective interaction between the participants; 2. methodical regulations and instruments of evaluation of innovative development of national economies; 3. international experience of state support for innovation, methods and models of their government regulation; 4. exit strategies of enterprises crisis status based on innovation; 5. instruments of attraction of investments in innovation and methodical principles of evaluation of the effectiveness of investment; 6. the imperatives of the market of scientific developments and innovative ideas in Ukraine; 7. the core technology of protection of rights and the economics of intellectual property, in particular, standards and intellectual property rights in Ukraine; 8. justification of the priority directions of innovation development, taking into account the needs and particularities of the national economy. <p>The student is able to:</p> <ol style="list-style-type: none"> 1. collect and systematize your marketing information for selection of target markets, measurement and forecasting demand, the positioning of the innovative product; 2. assess the situation, the dynamics, the efficiency of the innovation potential of

				<p>enterprises and justification of the priority directions of its extension;</p> <p>3. develop and justification of managerial decisions to ensure the efficiency of the innovation development of economic entities;</p> <p>4. identify and evaluate the risks of innovation activities, as well as to control their level of risk-management tools;</p> <p>5. provide economic justification of the choice of the method of protection of intellectual property rights of the enterprise.</p>
2	Tax Management	4	Exam	<p>The student knows:</p> <ol style="list-style-type: none"> 1. principles, methods, forms and means of tax relations; 2. regulatory organization of tax control; 3. ways of detecting evasion from payment of taxes; 5. procedure for appeal of decisions of regulatory agencies; 6. experience of organization of collection of taxes of foreign countries; <p>The student is able to:</p> <ol style="list-style-type: none"> 1. correctly determine deadlines accrual, redemption of tax liabilities and tax reporting to taxpayers; 2. provide justification of the need for a taxpayer in certain types of penalties for violations of tax legislation, and also to charge financial sanctions and penalties.
3	Insurance Management	4	Exam	<p>The student knows:</p> <ol style="list-style-type: none"> 1. features and prospects of the development of entrepreneurial activity in insurance; 2. the essence, function and role of insurance management in a market economy; 3. procedure design, registration and licensing of insurance of organizations, the table of contents of state oversight of their activities; 4. the principles of rational structures of organization and powers of its management; 5. the principles of management of an insurance company; 6. the meaning and methods of the development of the strategic plan of activity of the insurer; 7. the essence and ways to revitalize the marketing activity in insurance organizations; 8. methods of study of the demand for insurance services; 9. technology of risks selection for insurance and settlement of insurance claims; 10. features of cash flows management in insurance;

				<p>11. the conditions and ways to improve the financial stability of the insurance organization;</p> <p>12. procedures implementing financial monitoring of operations of the insurer.</p> <p>The student is able to:</p> <ol style="list-style-type: none"> 1. develop the mission, goals and strategic objectives of the insurer; 2. form rational management structure of the insurance organization; 3. organize the process of budgeting in insurance organization; 4. explore the state of the market of insurance services; 5. explore demand for insurance services and organize an efficient system of their sale; 6. arrange insurance agreements and monitor their implementation; 7. make documented insurance cases and forecast the size of insurance payments to victims; 8. analyse the activity of the insurer and propose measures aimed at its improvement; 9. determine the sufficiency of funds of insurance reserves to ensure fulfilment of commitments before the insured; 10. determine directions for effective placement of insurance reserves and temporarily free funds of the insurer; 11. ensure control of financial reliability of the insurance company; 12. carry out verification of the correctness of the adjustment of financial operations; 13. Carry out financial monitoring in the insurance organization.
4	Financial Intermediation	2,5	Credit	<p>Student is able to:</p> <ol style="list-style-type: none"> 1. Explain: <ul style="list-style-type: none"> - the essence of financial intermediaries and their functions; - the classification of financial intermediaries; - methods of state regulation of the financial intermediaries activity; - the modern system of government institutions in the sphere of regulation of financial intermediaries activity. 2. Describe: <ul style="list-style-type: none"> - peculiarities of state regulation of the financial intermediaries activity in Ukraine; - methods of analysis of financial condition of certain types of financial intermediaries;

				<ul style="list-style-type: none"> - specific features of functioning of certain types of financial intermediaries; <p>3. Define:</p> <ul style="list-style-type: none"> - general state of functioning of certain types of financial intermediaries; - the analysis of macroenvironment of certain types of financial intermediaries activity; - problems in the functioning of financial intermediaries and propose measures to solve them.
5	Crediting and control	2,5	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - concepts and terminology concerning the organization and regulation of banking activity and bank lending; - fundamental difference between existing forms of credit (commercial, banking, leasing, mortgage, government, etc.); - nature of credit market of banking services taking into account the regularities of solving the question of organization of the major directions of crediting; - the structure of assets and liabilities of commercial banks. <p>2. Describe:</p> <ul style="list-style-type: none"> - content and structure of the loan process in Ukraine; - main participants of lending process; - development trends of credit market in Ukraine and worldwide; - basic forms of credits which are realized in modern conditions; - the main risks that arise while crediting. <p>3. Define:</p> <ul style="list-style-type: none"> - effectiveness of operations conducted by the bank, and find optimal solutions; - creditworthiness of the borrower of such entities: individuals, a bank and a state; - the level of risk that may be in the process of crediting; - prospects of credit market development in Ukraine.
6	Methodology of Scientific Researches	2	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - classification of scientific researches; - basic concepts of scientific research methodology and its components; - the classification of methods of scientific research; - structure of scientific-research work; <p>2. Describe:</p>

				<ul style="list-style-type: none"> - methods of selection of the object and subject of research; - general methods of scientific research; - methods of problems research in the sphere of economics and finance; <p>3. Define:</p> <ul style="list-style-type: none"> - object and subject of scientific research; - sources of scientific information; - results of scientific research.
7	Simulation of Market Entities Activity	2	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - the essence of modelling and a model; - the classification of economic models; - functions of economic modelling; - stages of economic modelling; <p>2. Describe:</p> <ul style="list-style-type: none"> - methods of modelling of business entities activity; - advantages and disadvantages of the use of certain types of simulation of business entities activity; - limited possibilities of using modelling of business entities and conditions of its conduction; <p>3. Define:</p> <ul style="list-style-type: none"> - models of describing certain economic processes; - projected performance of the business entities; - scenarios for the future development of individual market entities.
8	Social Insurance	2,5	Credit	<p>Student knows:</p> <ol style="list-style-type: none"> 1. fundamentals of compulsory State social insurance, the legal framework, principles of social insurance; 2. sources of the formation and direction of the use of funds generally bindings state social insurance data management foundations from the side of the insured persons and employers. <p>Student is able to:</p> <ol style="list-style-type: none"> 1. analyse and synthesize material on the problem, formulate conclusions and proposals, perform calculations of indicators; 2. use acquired knowledge in different situations.
9	Insurance Mechanism of Social	2,5	Credit	Student is able to:

	Protection			<p>1. Explain:</p> <ul style="list-style-type: none"> - main provisions of the legislative and normative base of social insurance; - the essence and role of social insurance in the market conditions; - the mechanism of functioning of social insurance; - composition and organization of activity of social security funds; - the system of management of the social insurance funds activity. <p>2. Describe:</p> <ul style="list-style-type: none"> - peculiarities of social insurance management; - main types of material security and social services according to social insurance; - basic problems of social insurance development; - directions for improvement of social insurance in Ukraine. <p>3. Define:</p> <ul style="list-style-type: none"> - the essence and principles of social insurance organization; - current state and prospects of social insurance development; - conditions for the implementation of social insurance; - directions of social security funds activity; - measures to improve efficiency of social insurance; - prognostic indicators of social insurance.
10	International Finance	2	Credit	<p>Student is able to:</p> <ol style="list-style-type: none"> 1. Explain the basic provisions of the legal framework in the field of international finance; functions and structure of the world market; currency markets and currency transactions. 2. Describe the principles and organizational-legal features of the regulation of international finance; forms and types of international credit. 3. Identify the currency quotations; international credit conditions; the impact of TNCs on the country's balance of payments.
11	Finance of Foreign Corporations	2	Credit	<p>Student is able to:</p> <ol style="list-style-type: none"> 1. Explain the basic provisions of the legal framework in the field of foreign corporations; functions and structure of foreign corporations management; currency transactions. 2. Describe the principles and organizational-legal features of foreign corporations management; forms and types of international credit. 3. Identify the currency quotations; international credit conditions; the impact of foreign corporations activity on the country's balance of payments.

12	Management of Financial Sanitation of an Enterprise	3	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - main provisions of the legislation on the sanitation procedure and bankruptcy of enterprises in Ukraine; - the nature and economic content of sanitation and financial sanitation; - rules of conducting judicial and pretrial sanitation. <p>2. Describe:</p> <ul style="list-style-type: none"> - the mechanism for evaluating sanitation ability of an enterprise; - methods of state financial support to enterprises for their recovery; - Classic plan for financial sanation; - proposals for sources of financing sanation measures on a specific enterprise. <p>3. Define:</p> <ul style="list-style-type: none"> - indicators of sanation ability of an enterprise; - level of probability of an enterprise bankruptcy according to financial reporting; - methods of restructuring of an enterprise and its balance.
13	A Systematic Analysis in the Economy	3	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - stages of development of systematic concepts, main directions of systems research, basic concepts (CA), and principles of the systematic approach; - systematic-methodological aspects of modelling; - principles of a systematic approach to the CIS and objects of computerization. <p>2. Describe the methodology and methods of CA; methods of obtaining information for CA; basic methods of designing CIS.</p> <p>3. Define:</p> <ul style="list-style-type: none"> - problems to which the application of CA is appropriate; - analytical and synthetic approaches to modelling CIS and objects of computerization; - life cycle of the system, apply the methodology, methods and algorithms of systems analysis for solving problems in complex objects of computerization; - CA methodology when designing specific EIS.
14	Banking Management	3	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - main provisions of the legislative and regulatory framework of banking management;

				<ul style="list-style-type: none"> - basic concepts of a banking firm, objectives and sectoral features of banking management; - principles, structure and functions of banking management; - features of strategic banking management; - nature, basic subsystems and process of planning in a bank; - a system of standards and principles of corporate governance in banks; - main directions of financial management of a bank; - key points of the risk management system in banks. <p>2. Describe:</p> <ul style="list-style-type: none"> - basic models of corporate bank management; - types and kinds of responsibility centers of a bank; - main business-processes of a bank; - management technologies of banking business; - methods of managing liabilities and assets of a bank; - methods of managing liquidity and profitability of a bank; <p>3. Define:</p> <ul style="list-style-type: none"> - structure and quality of assets and liabilities of a bank; - sources of formation of incomes and expenses; - the financial position of a bank; - problematic features and level of riskiness of banking activity; - the system of criteria for making optimal management decisions; - effective targeted programs with the use of modern methods of conducting banking operations and services.
15	Banking Activity Management	3	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - main provisions of the legislative and regulatory framework of banking activity; - principles of setting goals and constructing strategy of development and management of commercial bank activity; - the nature, role and main elements of the planning system in a bank; - typical organizational structure and control elements of a bank; - main directions of the financial activity of a commercial bank; - main provisions of the system of providing risk management in banks. <p>2. Describe:</p> <ul style="list-style-type: none"> - methods of forming and managing equity and liabilities of a commercial bank;

				<ul style="list-style-type: none"> - methods of asset management of a bank, credit and investment portfolio; - methods of managing liquidity and profitability of a bank; - spheres of display and the main methods of management of banking risks; - the system of decision-making related to the implementation of banking business processes. <p>3. Define:</p> <ul style="list-style-type: none"> - structure of assets and liabilities of a bank, sources of formation of incomes and expenses, financial position and profitability indicators of a bank; - problematic features and level of riskiness of banking activity; - the system of criteria for making optimal management decisions; - effective targeted programs with the use of modern methods of conducting banking operations and services.
16	Financial-Economic Security	2	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - main provisions of the legislative and normative framework for financial and economic security; - the content of the concept of financial and economic security of economic entities; - theoretical foundations of planning financial and economic security of economic entities. <p>2. Describe:</p> <ul style="list-style-type: none"> - factors of internal and external environment; - conceptual foundations of economic security of the state, region, enterprise, individual; - mechanisms, methods, criteria, indicators of management of the system of financial and economic security of the state, region, enterprise (organization, institution). <p>3. Define:</p> <ul style="list-style-type: none"> - purpose and content of the strategy of economic security of an enterprise, institution or organization; - classification of risks and threats to the economy entity; - the type of security and is able to analyse financial security (including fiscal, monetary, debt, monetary and credit safety and security of the insurance market, the safety of stock market), macro-economic, investment, innovation, human resources, industrial and other types of security;

				- effectiveness of the system of financial and economic security in conditions of risk and uncertainty.
17	Business Security	2	Credit	<p>Student is able to:</p> <p>1. Describe:</p> <ul style="list-style-type: none"> - the essence of " business security" as the economic category; - structure and content of work on ensuring the business safety; - ways of identifying the business security threats and risks. <p>2. Describe:</p> <ul style="list-style-type: none"> - methods, techniques, criteria and indicators for assessing the safety of business structures; - principles of business security insurance; - strategy of business security management. <p>3. Define:</p> <ul style="list-style-type: none"> - technologies of analysis and evaluation of components of business security; - analysis and evaluation of risks and threats; - effectiveness of creating business security system and minimizing risks and threats of business structures.

Semester 3

No	Course unit title	ECTS	Control	Learning outcomes of the course unit
1	Civil Protection	1	Credit	<p>Student is able to:</p> <p>1. Explain:</p> <ul style="list-style-type: none"> - preventive and operative (emergency) measures of civil protection; - state of readiness of a department to work under the threat of emergencies by established criteria and indicators; - the need for quality training of employees on CP, providing assistance and consultations to employees of the organization (division) on practical issues of protection in emergencies. <p>2. Describe:</p> <ul style="list-style-type: none"> - the spheres of one's responsibilities in the direction of professional activity considering tasks of CP; - conditions of the emergence and development of emergency and coordinated actions to prevent them in accordance with one's professional duties;

				<p>- methods and tools for monitoring of emergencies, building models (scenarios) of their development and evaluation of their social and economic consequences.</p> <p>3. Define:</p> <ul style="list-style-type: none"> - latest achievements in the theory and practice of security management in an emergency; - methods of forecasting and assessment of the situation in the area of emergency, calculation of parameters of affecting factors of emergency sources, controlled and used for forecasting.
2	Intellectual Property	1	Credit	<p>Student knows:</p> <ol style="list-style-type: none"> 1. basic concepts and categories in the sphere of intellectual property; 2. elements of the international system of intellectual property protection; 3. components of the intellectual property system in Ukraine, objects and subjects of intellectual property right; 4. rights and obligations of owners of protection documents on the intellectual property objects; 5. mechanism of protection and enforcement of intellectual property rights under the law of Ukraine; 6. mechanisms of protection and enforcement of intellectual property rights in accordance with international law. <p>Student is able to:</p> <ol style="list-style-type: none"> 1. freely orient in national and international law on intellectual property, interpret and reveal the basic concepts, institutions and categories of intellectual property, practically apply the norms of law; 2. establish the fact of violation of rights of owners of current protection documents and applicants for intellectual property rights, correctly determine issues of intellectual property and the law in this area and possible ways to overcome them.
3	Investment Management	3	Exam	<p>Student is able to:</p> <ol style="list-style-type: none"> 1. explain the choice of the investment concept. 2. describe the management mechanism of the investment activity of an enterprise. 3. determine the effectiveness of financial and real investments.
4	Project Investment	3	Exam	<p>Student is able to:</p> <ol style="list-style-type: none"> 1. explain the benefits of project investment in comparison with the traditional one and principles of choice of the investment strategy. 2. describe the mechanism of managing the development of investment projects.

				3. Determine the indicators of efficiency of investment projects, estimate the cost of investment resources.
